FRASER SUITES SYDNEY

Artichoke—How do the rooms of the Fraser Suites in Sydney create a place that is a “home away from home?”

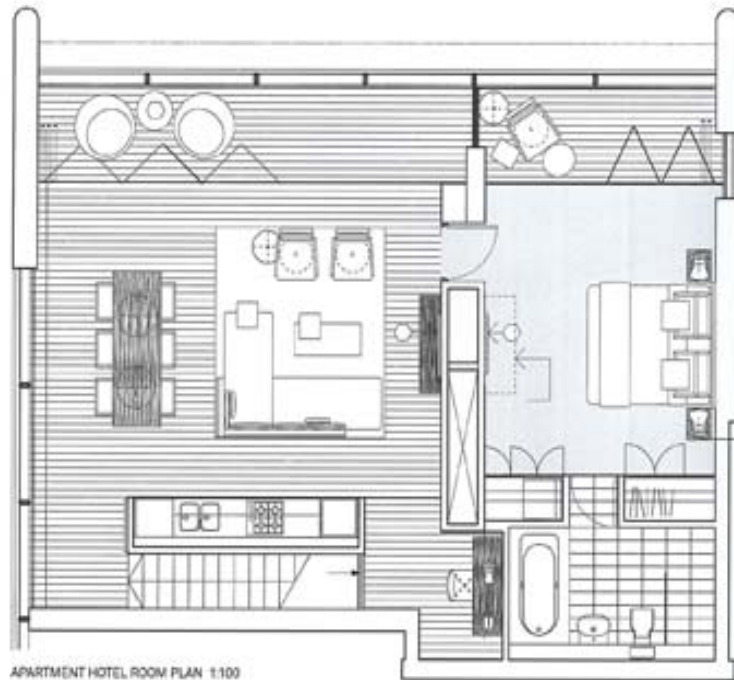

RLD—Our response to the design brief for Fraser Suites in Sydney was to look beyond the familiarity of a typical hotel and create a luxurious home away from home.

The suites are larger than hotel rooms with even the one-bedroom suites three times the size of an average hotel room. The designer kitchens are fully equipped with feature stone benches, imported steel appliances and coloured glass splashbacks. Living rooms are generous in proportion and cater for state-of-the-art entertainment and audio systems. Study desks are incorporated in all suites for business needs, some suites have dedicated rooms for a study/office and all suites feature laundry facilities.

Custom-designed furniture embellished with lustrous fabrics, five-star-quality bedding, fine crockery and cutlery, limited edition prints and original artworks complete the essence of luxurious and sophisticated living. The interiors of all suites exude warmth and style and have been designed to appeal to the most discerning business and leisure travellers. Guests are provided with a unique luxury experience.
